Custom Web and Software Solutions for Your Business

Based in Berlin, Germany · German & English · Web development since 2018

SERVICES

- **Websites & Corporate Presence**
  Fast websites that are easy to find on Google.
- **E-Commerce & Online Sales**
  Online shops and ordering systems with secure payments.
- **Web & Software Applications**
  Custom software for your workflows.
- **Automation & AI**
  Automate repetitive tasks and use AI where it actually saves you time.

HOW I WORK

- Dedicated point of contact — from idea to operation
- Remote for clients across German- and English-speaking markets
- Solutions that keep running well for years
- Clearly structured and well documented

TECHNOLOGIES & PLATFORMS

WEB DEVELOPMENT
HTML, CSS, JavaScript, TypeScript, PHP, Laravel, Symfony

CMS
TYPO3, Contao, Drupal, WordPress

E-COMMERCE
Shopware, Magento (Adobe Commerce), WooCommerce

SOFTWARE DEVELOPMENT
Python, C#, C++

DATABASES & APIS
SQL / MySQL, REST APIs

TOOLS
Git, Docker, Composer

HOW WE WORK TOGETHER

1. **Initial call**
   Clarify goals, scope and constraints — no obligation.
2. **Concept & quote**
   Document requirements, estimate effort and agree on a timeline.
3. **Development**
   Built in stages, with regular progress updates.
4. **Testing & go-live**
   Acceptance, handover and launch into production.
5. **Support**
   Maintenance, updates and further development on request.

PROJECT EXAMPLES

WEB DEVELOPMENT

TYPO3-Based Customer Portal

SERVICES · PHP · MYSQL

Protected area where customers access their documents and invoices. Permission management controls who can see what. Invoices come straight from the accounting system via an interface.

E-COMMERCE

Shop Migration Magento → Shopware

RETAIL · PHP · MYSQL

Products, customers and order history transferred by migration script. Switchover with zero downtime; old URLs were kept working through redirects.

SOFTWARE DEVELOPMENT

ERP Integration for an Online Shop

LOGISTICS · C# · INTEGRATION

C# application that connects a logistics company's online shop to its inventory management system: stock levels, prices and orders are synchronized automatically — no manual re-entry.
